## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by German Patent Document DE 44 45 204 A1 to Chen.

Chen discloses a vehicle, i.e. a bicycle, and a method and apparatus for mounting a handlebar 40 to the vehicle comprising two mounts 20 each having riser member including a first portion comprising a handlebar connecting structure with a clamping structure having a semicircular groove 21 therein and a second portion comprising a vehicle connecting structure with a clamping structure having a cylindrical portion 10 extending at a right angle therefrom. The mounts are spaced from one another and the spacing may be varied. The handlebar may be rotated about a first and second axis, as seen in Figure 6.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows various structures with handlebars mounted to vehicles utilizing pairs of mounts that are spaced from one another and two axes of rotation for locating the handlebar.
